SUMMARY OF SKILLS

Frontend Software Engineer skilled in Javascript, HTML, CSS, and MySQL seeking for an entry-level role. Passionate about learning and collaborating on innovative projects. Strong attention to detail and problem-solving abilities.

SKILLS

Programing Languages: Javascript, CSS, HTML, Linux, PHP

Frameworks and Libraries: React JS, Bootstrap, jQuery, Sass, MUI

Database: MySQL

Other: Visual Studio Code, FileZilla, Github, XAMPP, Lucidchart, Microsoft Office, Trello

TECHNICAL PROJECTS

Dealership Full Stack Application

- Developed using PHP, MySQL, Bootstrap, and Apache
- Responsive user interface designed with Bootstrap
- PHP handles backend processing and interacts with MySQL
- MySQL database stores and organizes car inventory data

Hackathon Winner - Full Stack Application for Startup Company

- Developed the frontend of the application using React, and React Bootstrap while collaborating closely with the UI designer to ensure a seamless user experience.
- Overcame the challenges of working across three different time zones by using video conferencing tools such as Zoom, and Ms Teams to stay in constant communication and maintain project momentum.
- Pitched the final product to a panel of judges and won first prize in the competition.

React Todo App

- Developed a task manager application using React JS that allows users to add and delete tasks with ease.
- Implemented a local storage solution to store user tasks locally on their device for easy access and persistence.
- Incorporated a light and dark theme toggle feature to enhance the user experience and accommodate user preferences.

EXPERIENCE

Housatonic Community College

Counseling and Wellness Web Developer

Bridgeport, Connecticut
