SUMMARY OF SKILLS

Frontend Software Engineer skilled in Javascript, HTML, CSS, and MySQL seeking for an entry-level role. Passionate about learning and collaborating on innovative projects. Strong attention to detail and problem-solving abilities.

SKILLS

Programing Languages: Javascript, Python, CSS, HTML, Linux, PHP
Frameworks and Libraries: React JS, Bootstrap, jQuery, Sass, MUI
Database: MySQL, MongoDB
Other: Visual Studio Code, FileZilla, Github, XAMPP, Lucidchart, Microsoft Office, Trello

TECHNICAL PROJECTS

Car Dealership Database
- A Car Dealership Database project that allows users to search for specific car make, models, and trims from a database. The project is built with MySQL to create the database and store the data.
- Created tables, and identified relationships between entities. Implemented SQL, created schema and identified data types.

Hackathon Winner - Full Stack Application for Startup Company
- Developed the frontend of the application using React, and React Bootstrap while collaborating closely with the UI designer to ensure a seamless user experience.
- Overcame the challenges of working across three different time zones by using video conferencing tools such as Zoom, and Ms Teams to stay in constant communication and maintain project momentum.
- Pitched the final product to a panel of judges and won first prize in the competition.

React Task Manager App
- Developed a task manager application using React JS that allows users to add and delete tasks with ease.
- Implemented a local storage solution to store user tasks locally on their device for easy access and persistence.
- Incorporated a light and dark theme toggle feature to enhance the user experience and accommodate user preferences.

EXPERIENCE

Housatonic Community College   Bridgeport, Connecticut
Counseling and Wellness Web Developer   February 2022 - Current

- Developed Housatonic Community College's Counseling and Wellness webpages, by writing CSS, HTML and JavaScript codes.
- Collaborated with the Web Master and Marketing Department to assist with the development of Gateway Community College's website. Optimized and updated HTML and CSS files.
